EDUCATION

University of Michigan - Ann Arbor *Expected Graduation: May 2027*

Bachelor of Science, Data Science

Coursework: Data Structures and Algorithms, Linear Algebra, Discrete Math, Multivariable Calculus, Cloud Management, Database Management Systems, Probability, Object Oriented Software Design, Data Visualization, Computer Organization

WORK EXPERIENCE

RouteOne **Farmington Hills, MI**

Software Engineer Intern *May 2025 – Present*

- Supported cross-company data needs by delivering ad-hoc Tableau reports and tracking sprint progress with Scrum
- Engineered a churn prediction model in Python using scikit-learn (logistic regression), analyzing dealership usage frequency and last login date, achieved 84% precision and provided a 4 week forecast window for sales team
- Designed a recommendation engine for dealership menu products using demographic, geographic, and vehicle history data; containerized the solution to return top 5 product recommendations and dealer-level analytics, achieving a 5% adoption rate across all customers.

Swsh **New York, NY**

Software Engineer and Growth Intern *August 2024 – January 2025*

- Closed 30+ partnerships with fraternities nationwide, promoting swsh as the go-to photo album app for Greek life
- Enhanced the app's facial recognition by optimizing input image preprocessing and tuning AWS Rekognition parameters
- Contributed to backend optimization and frontend debugging during weekly sprints using Postman and React Native

Circlez **Boston, MA**

Software Engineer *January 2024 – June 2024*

- Built a full-stack gamified task tracking app using Flutter and Firebase; Gained over 400+ users within two months
- Implemented caching layers and optimized calls to address backend latency issues in Firebase, improving data speed
- Designed and deployed marketing site using React and Tailwind improving user engagement metrics and experience

RevRoad **Provo, UT**

Venture Capital Scout *May 2024 – June 2024*

- Performed market research to analyze 3 key edtech trends, contributing to 2 active investment discussions
- Utilized an internal database to research over 50 emerging startups in the edtech sector that met specific investment criteria, ultimately narrowing the selection to 10 startups for comprehensive evaluation and potential funding

PROJECTS

Raay (**Mongo DB, Express.JS, React.JS, Node.JS, EC2**)

- Built a platform of next generation AI Interns capable of coding, marketing, and investor outreach by training models on internal documents, meeting transcripts, and email threads
- Created a system using AWS EC2 to enable the AI Intern to interact with a OS, simulating a human team member
- Led growth and user testing that revealed the product helped teams ship their MVPs 87% faster and 66% cheaper

Michigan Grades (**Vite, Tailwind CSS, PapaParse, Chart.JS**)

- Designed a React + Vite front-end to visualize FOIA grade distributions for undergraduate classes
- Gained over 660+ visitors in the first week allowing students to make better decisions when it comes to class selection
- Rendered interactive grade charts using Chart.JS with breakdowns for individual semesters and professors

LEADERSHIP AND ACTIVITIES

180 Degrees Consulting | *Vice President of Technology* *September 2024 – Present*

- Started initiatives around startup consulting within the club, introduced multiple early-stage tech startups as clients
- Authored a research paper on the business implication of artificial intelligence in a diagnostic radiology within a hospital and clinical setting, discovered the use of AI agents allow for 13% more patient records to be analyzed in a day
- Led planning for annual Chicago Roadshow, coordinating visits and networking sessions with top consulting firms

Phi Gamma Nu - Omicron | *Tech Chair* *January 2024 – May 2024*

- Created a dashboard with all alumni with current contact information to increase alumni relations and networking

SKILLS & INTERESTS

- Languages: Python, C++, Javascript, TypeScript, SQL, Flutter
- Data Science Tools: Pandas, Scikit-learn, Matplotlib, Numpy, Seaborn
- Web Frameworks: React, Next.JS, Flask, Node, Express
- Databases: SQLite3, MySQL, PostgreSQL, MongoDB,
- Tools: Tableau, Git, Power BI
- Interests: Formula 1, Italian Cars, Texas Hold 'em Poker
